

VIRTUALITY

What meaning do forms of life in reality and forms of life in Internet have for human beings and their development?

What are the chances and what are the risks in modern communication in the digital world? How can we cope with the risks? What are the dangers? Does the virtual world have an impact on the people who are online? How do boundaries between reality and virtual reality blur?

Discussion plan: Virtual Reality

- What is real and what is virtual?
- What is the difference between dream, imagination and fantasy?
- Is a dream "virtual reality"?
- Is everything possible in "virtual worlds"?
- How do relationships change within the virtualization of our world?

Activities:

Consideration: Where does virtualization of life processes occur?

- Make a list and think about the consequences!

Consider: Virtual worlds and virtual reality:

- From where?
- Why?
- Where?
